

Dr Alexander Fielding

Dr Alexander Fielding is a member of the CAANSW Board.

He graduated from Macquarie University in 2010 and has since completed a Sports Science Chiropractic Diploma from the International Sports Chiropractic Federation, as well as currently studying biomechanics at Charles Sturt University.

Alex has worked in a variety of Chiropractic clinics and rugby union clubs, as a permanent impairment Advisor for an agent of WorkCover NSW and recently established his own clinic, Your Health Sport and Spine, situated in a medical centre in Dural.

Alex's main goals on the board will be to drive an evidence based approach for the profession, increase the utilisation of chiropractic amongst the NSW population, to ensure chiropractors are recognised as spine experts and have them further integrated into the Australian healthcare system.

The CAANSW membership can expect to deal with an honest and hard working professional who understands the changing landscape of the healthcare arena and wants to see Chiropractic as a respected and much needed health profession.

"My vision for the Chiropractic profession is to be the respected expert when it comes to musculoskeletal injury with a focus on injuries of the back and neck.

"I look forward to working with the board and the CAA membership to bringing Australian Chiropractic into the 21st Century."

Qualifications - Bachelor of Chiropractic Science, Master of Chiropractic, International Chiropractic Sport Science Diploma, Qualified Sports Trainer

Dr Andrew Iggo

Dr Andrew Iggo is a CAANSW Board Member.

Andrew grew up in New Zealand always imagining that he would study medicine, with a family history in the profession this seemed like a natural progression. However, after discovering Chiropractic in his early university days the concept of correcting the cause of health issues rather than focusing on the symptoms appealed to him. This led to a science degree and travel to Australia to study Chiropractic.

He completed his five years of Chiropractic studies at RMIT University and has 20 years experience throughout the world, having worked in New Zealand, Australia, Ireland and Scotland.

Andrew has undertaken research and further studies to make sure that he remains up to date with the latest advances in the profession. His special interest areas include infants/children's health and performance enhancement for professional athletes.

He currently works in a private practice in Fairlight on Sydney's Northern Beaches.

His main goals on the CAANSW board will be to see the brand of Chiropractic improved, as well as more support, direction and clarity given to students and new graduates entering the industry.

The CAANSW membership can expect to deal with a receptive and helpful professional who has an enthusiasm for advancing the profession and a passion for learning about the research that is beginning to explain 'what we have been doing in our offices for the past 120 years'.

"My vision is to see Chiropractic take its rightful place as the leader in health care. Few professions currently direct their focus and efforts at the proactive enhancing of human health and wellbeing. Salutogenesis is the key."

Qualifications - B.Sc. B.(App.)Sc. Chiro.RMIT

Sarah O'Neil

Sarah O'Neil is a member of the CAANSW Board.

As a recent graduate, Sarah is currently working in her first associated position in Sydney's Hills District.

During her time at university, Sarah worked as a chiropractic assistant for five years and during her final year worked as a chiropractic skills tutor in the undergraduate program at Macquarie University.

Her main goal on the CAANSW board will be to help minimise the divide between well-established members of the profession and recent graduates.

Sarah will be able to raise awareness within the association about the needs and concerns of recent graduates and to ensure they have the necessary resources to successfully transition into practice life.

The CAANSW membership can expect positive engagement when dealing with Sarah and an active board member who will listen to and understand their needs.

"My vision is that we firmly establish our position amongst both the medical community and general public as evidence-based musculoskeletal specialists and for there to be a better understanding about what chiropractors can do for the general public."

Qualifications – B.Chiro.SC, M.Chiro
